

CENTER SERIES
U.S./RUSSIAN DOCUMENTS

In 1993, the history office was asked to begin collecting documents related to U.S. and Russian cooperation. A memo was distributed by Mr. Puddy, Special Assistant for U.S. / Russian Programs, requesting that offices generating documentation related to U.S. / Russian cooperation send copies of their documents to the history office. The contents of this subseries is the result of that call for documentation. The collection contains documents dated between 1992 and 1994 from two sources. The procurement office sent copies of the NASA / NPO Energia contract and modifications. The working group sent copies of its documentation. Documents are organized chronologically beneath each heading. Reorganizations within JSC (including the loss of the history office function) minimized the return on this project. Total document received are less than 6 shelf inches.
