

ASTP SERIES

APOLLO SPACECRAFT PROGRAM OFFICE FILES

This subseries consists of files from the Apollo Spacecraft Program Office (ASPO). Mr. Glynn Lunney was the program office manager and this file contains much of his correspondence, both within NASA and with Russia. However, the bulk of this subseries is organized by subject and contains information about systems, equipment, etc. Some files contain a good deal of information on a given subject and others only a piece or two of correspondence. Some representative areas are ASTP Communications System, ASTP Reentry, Attenuator Glare, Docking Seals, EVA Transfer Decision, Goals and Objectives, and Stress Corrosion. The subseries is divided into four sections: General Subject Files, Internal Correspondence, Correspondence to USSR, and Correspondence from USSR. Subject files are organized alphabetically and correspondence files chronologically.
