

ASTP SERIES
SOVIET PROGRAMS AND AUTHORS

This subseries consists of technical translations, copies of newspapers and magazine articles, and other documents which were written in some cases by Soviet authors and in all cases deal with Soviet spaceflight. A number of the documents are in Russian and not translated. The documents are arranged in chronological order and span the years 1959 - 1976 (the bulk of the documents run between 1972 and 1974). The materials were collected and used as background source material for the history of the Apollo Soyuz Test Project, "The Partnership."
