

ASTP SERIES
JOINT MEETINGS DOCUMENTS

These records, made up of materials prepared for and during joint meetings of Soviet and American personnel, include reports, Interacting Equipment Documents, drawings, articles, and audio tapes. They are arranged as received from the Johnson Space Center Technical Library, by meeting date and then according to a scheme used by the History Office there. A "data file" located immediately behind the meeting date lists the documents related to the meeting, followed by the documents. The meetings represented here span the period 1971 - 1975, but most fall in the years 1973 - 1975. For some meetings the holdings are more nearly complete than for others. Gaps may be filled with documents from the 10000 - 50000 Series Documents (Boxes 1274 - 1293). Where records are lacking in the Joint Meetings Documents, it may be possible to reconstruct a meeting from the Working Group Documents (Boxes 1246 - 1257) or from the 10000 - 50000 Series Documents.
