Highlighting Scholarly Information Services & Resources for the UHCL Community

FROM THE EXECUTIVE DIRECTOR

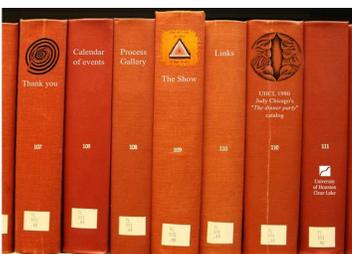

It is with great pride that Neumann Library showcases the iconic artwork of Judy Chicago. Providing the setting for this important art exhibition creates a unique opportunity for Neumann Library to touch our students' lives and imaginations as an active partner in the intersection of scholarship, community and learning. Neumann Library has always sought to advance and enrich our students' educational experience by providing a place where they can come together on levels and in ways they might not in the classroom.

Our deepest thanks go to Dr. Jane Chin Davidson, Alisa Tutt, Victoria Hoover, and all who made the *Setting the Table* exhibition and associated programs possible, including the University of Houston-Clear Lake, the Houston Endowment (a philanthropy endowed by Jesse H. and Mary Gibbs Jones), the Houston Arts Alliance, and the City of Houston.

Improved functionality for library's research guides

Many pages on the library website are in transition as librarians create [research guides](#) that provide one-stop access to important resources, services, and instructional materials. The sample below shows content from the [Videos](#) tab on the [Early Childhood Education](#) guide. On this page, users can access relevant streaming video databases and individual videos, information about featured DVDs, forms for requesting a video that the library lacks, and [Ask a Librarian](#) options. A link

also is provided to the Library Catalog's advanced keyword search form, next to an illustration showing how to limit such searches to UHCL videos.

Over 60 research guides currently are available, categorized as [subject](#), [course](#), or [general](#) guides. Faculty members can contact their designated library [liaison](#) or the [Coordinator of Library Instructional Services](#) to request a new guide.

A LOOK BACK IN TIME

The children of Max Faget, American engineer and designer who died in 2004 at age 83, have donated their father's professional and personal papers, including photographs, awards, yearbooks, home movies, scrapbooks, and letters to the UH-Clear Lake Archives. The collection, which provides a valuable glimpse into the personal history of a man considered an icon of the space program, will be made available to the public once processed, in about 18-24 months.

Max Faget holds a balsa wood model of his orbiter design.
