

**SKYLAB SERIES****NASA HEADQUARTERS CHRONOLOGICAL FILES**

The Skylab chronological files are miscellaneous reading files collected by the JSC History Office during the writing of the Skylab chronology. The subseries consists of correspondence, meeting minutes and agenda, and memoranda originating from offices at NASA Headquarters in Washington, D.C. Much of the material comes from the Office of Manned Space Flight and particularly from the desk of the Skylab Program Director. Although the subseries includes Skylab documents generated as late as 1979, the majority of material was produced between 1964 and 1973 during the developmental Apollo Applications phase and the operational Skylab period. Documents are filed alphabetically by office mail code and chronologically within each folder. This allows the researcher to access items from specific offices or directorates at Headquarters without searching through documents collected from other offices as well. Consult Appendix C for a complete listing of mail codes and office names.
