

**SKYLAB SERIES
EQUIPMENT AND HARDWARE**

This subseries includes documents relating to materials used in the Skylab flights as well as to procedures used in deciding which items were actually to be included on board. The emerging stowage lists at the end of the series are thus related to the final stowage documents found in the following series (Boxes 920-921) and also to those in Boxes 644-645.

Inventory**SubHeading:****Box Number: 918**
