

SKYLAB SERIES**FLIGHT DIRECTOR'S HANDOVER NOTES**

Skylab missions 1 through 4 ran from May 1973 through February 1974 and this subseries consists of change of shift notes from one flight director to the next for the duration of these flights. The records have not been re-arranged and are in the exact order in which they were received. Most are handwritten; many are undated; charts and computer printouts are dispersed throughout, and the records at first glance seem to be in a confusing array. Rearrangement, however, would disturb their integrity and continuity, and the present arrangement is the most cohesive. They are arranged in a basically chronological order, although documents are dated by day of the year number and Greenwich Mean Time. Folder titles give month/year and day numbers included in that time period. The first folder contains a list of personnel authorized to be in mission control which is included as a reference to identify persons mentioned in the notes. The last box contains Flight Management Team (FMT) notes and meeting minutes and also Skylab debriefing information.
