

SHUTTLE SERIES**MSC / JSC Documents**

This subseries consists of reports and presentation materials generated by the Johnson Space Center between 1969 and 1988. They were collected over a number of years from various sources and are arranged chronologically. Two addenda have been added to the collection and each is arranged chronologically. The dates of addenda I (beginning in box 48) documents range from 1969 to 1991 and of particular interest are the Flight Operation Manuals. The dates of addenda II (beginning in box 64) range from 1981 - 1986 and are primarily payload integration plans.
