

SKYLAB SERIES

POST SKYLAB SCIENCE REPORTS AND SYMPOSIA

This subseries consists of scientific papers, technical reports, and other information pertinent to scientific and technical findings of the Skylab missions. Among the subjects covered are technological accomplishments, living and working in space, moving from Skylab to Shuttle (lessons learned), experiments information, and earth resources information. A large part of the subseries is devoted to Science Symposia held after Skylab. Most documents were created in 1974 and 1975, although inclusive dates run from 1971 through 1977.
