TECHNICAL SERVICES DIVISION PHOTOGRAPHS

The Technical Services Division is "responsible for establishing, operation, and maintaining real property facilities, special purpose plants, and all shops required to construct or manufacture components and assemblies of wood, metal, plastic, glass, and fabric for evaluation, test, or display purposes." (Blue Book) The division is composed almost entirely of skilled craftsmen and machinists who support the test activities and hardware development efforts of Program Offices and directorates on site. Many of the photographs in this collection depict prototypes built by the division. They are arranged chronologically and span the years 1958 through 1972.

Inventory

SubHeading:	Box Number: 01	
	Machine and Assembly / Sheetmetal and Welding Branch Photographs	1959
	Technical Services Division Photographs (3 folders)	1959
