

SPACE STATION SERIES

SPACE STATION CHRONOLOGICAL FILES

This subseries contains information from some of the earliest conceptualizations of the Space Station starting with the well-known "Man in the Moon" series in a 1952 edition of Collier's magazine. The group consists of a large variety of materials including meeting minutes, study reports, SOW's, briefing charts and correspondence. It is arranged chronologically and is dated between 1952 and 1983.
