

CENTER SERIES**PAUL PURSER LOGS TO DR. GILRUTH**

This subseries contains weekly logs chronicling the activities of the Director's office. They were kept by Paul Purser, Aeronautical Research Engineer and eventual technical assistant to MSC Director Dr. Robert Gilruth. Interspersed with the logs are significant memos and meeting minutes that augment the contents of the logs. They have been left in their original order. The logs are an important resource for understanding the early workings of the STG and the Manned Spacecraft Center. They are dated from 1956 through June of 1962 and are nearly complete for those years.

Inventory**SubHeading:****Box Number: 1**

Weekly Logs for Dr. Gilruth (5 folders)

1956 - June 1962

Purser Discussions with Gilruth
(handwritten notes)

1961 - 1964
