

**SKYLAB SERIES**  
**PROGRAM DIRECTIVES**

Skylab Program Directives define program requirements and responsibilities for initiating actions necessary in mission design, space vehicle modifications and tests, experiments, crew preparation, launch operations, communications, tracking, mission control and flight operations' to accomplish the mission for which the directive was written. They are filed numerically and span the years 1966 through 1972. Also filed in this subseries are the agenda and minutes from a series of Flight Operations Plan meetings held in 1967 and 1968. They are inter-filed with the Flight Mission Directives for AAP-1A.
