

SKYLAB SERIES
PROCEDURES, MANUALS, AND CHECKLISTS

The procedures documents and manuals in this subseries provide guidelines for the operation of aspects of the Skylab program such as the ground communications loop and the test range facility. They are followed by checklists that very specifically document the in-flight activities of flight crew members and ground controllers. All three types of documents are used extensively as "ready reference" materials during a mission. They are filed by subject and chronologically within each run of documents. They were produced between 1971 and 1973.

Inventory

SubHeading:	Box Number: 625	
	Apollo and Skylab CSM Procedures for Performance and Control of Prelaunch Hazard Analysis	March 1971
	CSM Procedures for Orbital Phase of Skylab 1/2288 Mission, Basic Issue	December 31, 1971
	Backup CSM Procedures for Skylab 1/2 M=5 Rendezvous, Basic Issue	December 31, 1971
	Range Safety Manual, Volume 1	September 1, 1972
	Communications Ground Rules and Loop Directory for Skylab, Revision A	July 15, 1973
	Skylab Recovery Operational Procedures Manual	October 24, 1973
	SL 1/2 SWS Deactivation Checklist Experiments Log Sheet and Procedures	n.d.
	SL-3 Basic SWS Systems Checklist	May 7, 1973
