

**SKYLAB SERIES**  
**MANAGEMENT REVIEWS**

This subseries contains runs of agenda, meetings minutes and presentation material from Skylab Management Reviews (attended by representatives of NASA Headquarters, MSC, KSC and MSFC). These regular meetings were held to review program progress. Also in this subseries is a similar run of documents for regular Management and Business Management meetings attended by MSC representatives and program managers from the Martin Marietta Corporation. Budget questions and hardware development action items were considered at these gatherings that were held monthly. The material is filed by type of review and chronologically within each group. The vast majority of these items were produced in 1970 and 1971.
