

**SHUTTLE SERIES
PHASE B DOCUMENTS**

The Phase B documents consist of the Source Evaluation Board file, SEB Business Management documents, statements of work, and study control document, in that order. The source evaluation board files were left in the order received, and within the folder, are filed by tab numbers. An index to the tabs is the first document in the folder. The business management documents were filed chronologically since the tab system used with those documents was less complete. These documents were culled from the Procurement files received from the Building 1 vault.
