

**SHUTTLE SERIES  
FLIGHT DIRECTOR'S LOG**

This subseries contains the Flight Director's Logs and consists of mission reports, anomaly logs, press information, flight reviews, presentations, and correspondence. These files have been maintained essentially in the order in which they were received not chronologically or as flown. Earlier Flight Director's Logs have been integrated into mission documents. See STS-1 thru STS-41 inventories. In cases where documents in the Flight Logs duplicate those in other subseries we have retained title page covers only and have added location information for the full text document. Dates range are from 1983 to 1985.
