

SKYLAB SERIES
DESIGN CERTIFICATION REVIEWS

Design Certification Reviews (DCR's) assessed designs to be sure that they met Skylab Requirements for performance, reliability, and safety. Most of the documents in this subseries are concerned with assessment and certification of medical, EREP (earth resources experiment package), and other experiments. They are arranged chronologically and span the years 1970 through 1973. The majority of the documents, however, were produced between June and August 1972.
