SKYLAB SERIES
JOHNSON SPACE CENTER CHRONOLOGICAL FILES

The Skylab chronological files are miscellaneous reading files collected by the JSC History Office during the writing of the Skylab chronology. The subseries consists of correspondence, meeting minutes and agenda, and memoranda originating from offices on site at the Johnson Space Center. Although the subseries includes Skylab documents generated as late as 1979, the majority of material was produced between 1964 and 1973 during the developmental Apollo Applications phase and the operational Skylab period. Documents are filed alphabetically by office mail code and chronologically within each folder. This allows the researcher to access items from specific offices or directorates at JSC without searching through documents collected from other offices as well. Consult appendix C for a complete listing of mail codes and office names.
