

SKYLAB SERIES
GENERAL SUBJECT FILES

This subseries consists of one to several folders on diverse subject areas. They are arranged alphabetically by folder title and chronologically within each subject. Most folder titles are self-explanatory. Several needing elaboration follow: *Inputs (Box 758) are statements from different managers used in drafting midterm reports. Input folder titles give the author's name and his subject. *Skylab Debris documents (Boxes 760-761) concern problems involved with Skylab hardware left in space. *Skylab Private Conversations documents (Box 759) are involved with astronaut air-to-ground communications and their right to privacy. *Truly Tigertales (Box 763) are reports from the astronaut representative at the OWS contractor's plant. *Wine Letters (Box 764) are letters from the public sharing their thoughts on astronauts being allowed wine on Skylab missions. Acronyms used in folder titles are CSM (command service module), CCB (configuration control board), SL-4 (Skylab 4), OWS (orbital workshop), MSFC (Marshall Space Flight Center), MSC (Manned Spacecraft Center).
